PROFESSIONAL SUMMARY

Computer Science student and full-stack developer building production web applications, REST APIs, and data-driven tools. Experience with TypeScript, React, Python, FastAPI, PostgreSQL, and machine learning workflows, with a strong foundation in testing, security, UI/UX, and collaborative software development.

EDUCATION

Bowling Green State University

Bachelor of Arts in Computer Science, Minor in AI & Society.

Bowling Green, OH

May 2027

PROJECTS

Repolume - Resume & GitHub Analyzer

Next.js, TypeScript, FastAPI, Python, GitHub REST API, pypdf

- Built a full-stack resume and public GitHub analyzer for early-career software roles, combining PDF parsing with repository evidence analysis.
- Designed a deterministic scoring workflow and FastAPI service, with optional AI-generated explanations that do not alter the underlying score.
- Integrated the GitHub REST API and a Next.js interface, with automated backend tests and CI validation for production builds.

Scrimnet Collegiate Scrim Web App

Next.js, React, JavaScript, Supabase Auth, PostgreSQL, Row Level Security, Supabase Realtime

- Built a full-stack, practice-first platform for verified collegiate Rocket League teams to find, schedule, and coordinate scrimms.
- Implemented team creation and verification, role-based permissions, scrim listings, opponent requests, confirmations, and private match workspaces.
- Added real-time private chat, team check-ins, rescheduling, cancellation/no-show workflows, and PostgreSQL Row Level Security policies.

NFL Quantitative Game Model

Python, pandas, scikit-learn, FastAPI, SQLAlchemy, React, Vite

- Built a full-stack sports analytics application for generating, inspecting, and grading NFL pregame forecasts.
- Developed chronological feature engineering and evaluation workflows with scikit-learn, including safeguards against future-data leakage.
- Connected model outputs to a FastAPI/SQLAlchemy backend and React dashboard with persisted predictions, history, and performance tracking.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, C++, C#, Kotlin

Frontend: React, Next.js, Vite, HTML/CSS, Blazor

Backend / Frameworks: FastAPI, ASP.NET Core, Supabase, REST APIs

Data / Databases: pandas, NumPy, scikit-learn, PostgreSQL, SQLite, SQLAlchemy, Firebase

Developer Tools: Git, GitHub, GitLab, GitHub Actions, VS Code, Xcode, Linux

EXPERIENCE

Laborer

Newsome Painting & Remodeling

2023 - 2026

Perry, OH

Food Runner

Village Pub

2021 - 2023

Perry, OH

ACTIVITIES & LEADERSHIP

BGSU Esports Team

Captain

August 2023 - Present

- Lead BGSU's Rocket League team, coordinating strategy, communication, and competitive preparation for collegiate esports competition.
