PROFESSIONAL SUMMARY

Full-stack Software Engineering student at Bowling Green State University with production experience building and shipping real software. Published TerritoryFlow, a cross-platform mobile app with live users, subscriptions, and App Store deployment, to version 1.2. Proficient across the full stack in TypeScript, React Native, Python, Node.js, PostgreSQL, and Firebase.

EDUCATION

Bowling Green State University

Bachelor of Science in Software Engineering, Minor in Science.

Bowling Green, OH

August 2023 – May 2027

PROJECTS

TerritoryFlow iOS App

React Native, Expo, TypeScript, Firebase, Mapbox, RevenueCat

- Built and published a cross-platform territory management app to the App Store, iterating to version 1.2 with ongoing updates and user acquisition efforts.
- Architected a premium subscription flow using RevenueCat and Apple In-App Purchases, including custom paywall design, subscription management, and App Store deployment.
- Implemented secure authentication and real-time cloud data synchronization using Firebase Authentication and Cloud Firestore, supporting persistent user data across devices.
- Integrated Mapbox SDK for interactive mapping, location management, and territory visualization for field sales workflows.
- Designed reusable React Native components and scalable architecture to support future CRM integrations and enterprise features.

Smart Activity Tracker API Web App <https://smart-activity-tracker.vercel.app/>

FastAPI, SQLAlchemy, Python, OpenAI

- Built a FastAPI backend for logging and analyzing user activity data with an SQLAlchemy-powered database layer.
- Integrated the OpenAI API to deliver personalized recommendations based on tracked activity history.
- Designed RESTful endpoints with input validation, error handling, and structured JSON responses.

Groupwork Web App

React, Express, PostgreSQL, Prisma

- Built a full-stack project management platform enabling teams to create, assign, and track tasks across projects.
- Designed a relational PostgreSQL schema using Prisma ORM, supporting users, projects, and task relationships.
- Implemented user authentication and role-based access control to manage team member permissions.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, C++

Frontend: React Native, React, Expo, HTML/CSS

Backend / Frameworks: Node.js, Express, FastAPI, Firebase

Databases: PostgreSQL, Cloud Firestore, SQLite, Prisma, SQLAlchemy

Developer Tools: Git, GitHub, VS Code, Xcode, Linux, App Store Connect, TestFlight

Technologies: REST APIs, Firebase Authentication, OpenAI API, Mapbox SDK, RevenueCat

ACTIVITIES & LEADERSHIP

BGSU Esports Team

August 2023 – Present

Captain

- Lead BGSU's Rocket League team, coordinating strategy, communication, and competitive preparation for collegiate esports competition.

EXPERIENCE

Laborer

2023 – 2026

Newsome Painting & Remodeling
